

It is my belief that BPL will radiate electrical noise from the unshielded power lines effectively drowning out most of the weak signals I receive as an Amateur Radio Operator. I believe it is my right to communicate in this manner and that it is the duty of the FCC to protect all services from interference. It would be a sad day indeed if the FCC would bow down to interests that want to "do it on the cheap". I have the highest respect for the FCC as you are my sole protectorate. Do the right thing. 73s Joe/KF6HAP/GROL PG1227197
